Student Sponsorship Bio

Project: Cashew Tree Programme

Name: Nikki Janella

Age: 3 years old

Location: Payatas, Quezon City

Education and Development
Nikki Janella is a nursery-age child beginning her early learning journey through the Cashew Tree Programme. She can already identify basic colours and simple shapes, showing encouraging progress in the early skills that will prepare her for school.

How Sponsorship Helps
Sponsorship will support Nikki Janella's early education and development, helping provide structured learning, educational materials, nutritious meals, health support, and a safe, nurturing environment during these important formative years.

Family Background
Nikki Janella lives with her parents and two older siblings in a crowded home shared with members of their extended family. Her father works as a driver, while her mother cares for the children and manages the home. The family supports one another, but their limited income makes daily and future educational needs difficult to meet.

Personality and Interests
Nikki Janella is cheerful, active, and playful. She enjoys spending time with her cousins, dancing whenever she hears music, and eating fruit and vegetables. Her favourite colour is pink, and she already dreams of becoming a nurse so that she can help and care for others.
